

Musical Pipes

Tap into your musical side with the homemade instrument!

1. Test your straw's tone by blowing across the top of the open side to try to make a note. Cut the straws into five different lengths so you have 5 different notes.
2. Tape the straws to the cardboard strip (shortest to longest). Try to leave a small gap between each straw.
3. Hold the musical pipe straws and blow across each straw.

ADDITIONAL QUESTIONS

- Which straw makes the highest noise? The lowest?

CREDITS
